

MURDER ON THE ZINDERNEUF

**PC, XT,
JR, COMPAQ**

TO START

Put the disk in drive A: and turn on the computer (or press Control Alt Del). Then follow the instructions as they appear on the screen, first to choose which detective you want to be and then to say whether you want to play with a joystick or the keyboard. If you choose to use a joystick, follow the on-screen instructions for calibrating it.

SOLVING THE CRIME

Use the joystick or the cursor keys to move about the dirigible.

When you encounter a suspect, use the joystick or the cursor keys to move the highlight in the "question the suspect" menus which will appear. Right and left move the highlight from item to item. Pressing the button or Enter selects the highlighted item. And in the case of suspect lists, up and down bring new suspect sets into view.

-MORE-

ELECTRONIC ARTS™

To review clues, stop your detective and press the button or the space bar. Then press the button again or Enter when you're ready to move on.

12 hours on the game clock equals about 35 minutes of playing time. To stop the game and make an accusation before time is up, press Q.

USING THE MANUAL

The manual, located inside the front cover of the package, contains descriptions of the suspects plus other information you'll find useful as you play.

The map on pages 6 and 7 is especially useful since it shows whose room is where. Please note that in the IBM and compatible versions, room carpet listed as gold on the map will appear as red on some screens. Other colors may vary as well, depending on your monitor settings. (Their pattern will remain the same -- i.e. all the ones labeled as gold will appear in the same color, all those labeled blue in the same color, etc.)

The colors listed for each character also vary in the IBM and compatible versions. Please note their color on your map as you encounter them. Also note these helpful facts: Only four colors are used; no two men with the same body type and no two women with the same body type will have the same color.

A general tip. Don't worry at first about who's who. Talk to as many suspects as possible, noting their color on the map as you come across each new one. By the time you've narrowed it down to particular suspects, you'll have a pretty good idea who's hanging out where, and you'll be on your way to recognizing different individuals on sight.

Esc -- Pause/Restart Game.

Control S -- Turns Sound On/Off.

Control J -- Interrupts the game so you can change between keyboard and joystick control and/or recalibrate your joystick.
