Ccommodore

Commodore Public Domain Series

Introduction

The set of programs in this package is one in a series of twenty-seven sets in the Commodore Public Domain Series. This series of prepackaged software is designed to introduce you to the many practical, educational, and fun applications your home computer offers. The programs in this series show you things like how to make a mortgage table, convert decimal numbers into hexadecimal, follow a flow chart, and play word games on your computer.

A list of the programs in this set appears on the back of your diskette's folder. You'll find a brief description of the other twenty-six software sets at the end of this instruction sheet.

How to Load a Diskette

Before you start to use the programs in this package, please take the time to learn how to handle the diskette and how to LOAD it properly.

Diskettes are very sensitive to heat, moisture, and magnetism. Follow these guidelines to avoid damaging your diskette:

- Always store your diskette carefully by putting it back in its sleeve and standing it on edge.
- Keep it at a moderate temperature, away from moisture, sunlight, and sources of magnetism such as loudspeakers and telephones.
- Avoid touching the exposed areas of the diskette; always hold it by the covered edges.
- · Don't bend the diskette, and don't attach paper clips to it.
- Use only a felt tip pen when you want to label a diskette.
- Don't open the disk drive gate when the red IN USE light is on.

Follow these steps to LOAD your diskette:

- 1. Turn on your computer and your disk drive.
- 2. Insert the diskette into the drive carefully. The side with the oval-shaped exposed area goes in first. The notched side should be on your left as you face the disk drive. Sometimes the notch is covered by a little piece of tape.
- 3. Make sure the diskette is firmly in place, and close the gate on the disk drive.
- 4. Key in: LOAD "program name",8
 The program names are listed on the diskette folder. Key in the one you want exactly as it appears in the list.
- 5. Press the RETURN key.
- 6. Key in RUN and press RETURN after the following messages appear on your screen:

Other Packages in this Series

Business I 14 programs that range from calculating interest to simulating business and stock transactions. Computer Science I 13 programs that include animation, drawing graphs, and sorting lists. English I 14 programs such as word games, parts of speech, poetry, and definitions. English III 16 programs such as word games, parts of speech, poetry, and definitions. English III 15 programs that include spelling and vocabulaty drills, homonyms, verb forms, and punctuation. English IV 15 programs on parts of speech. English IV 15 programs that include drills on rhyming, unscrambling words, and spelling. English VI 12 programs, including tests on word meanings, spelling, and vocabulary. English VII 3 challenging word games. Games II 14 fun and educational games. Games II 3 word guessing, logic, and math games, and a simulation of Hi-C. Games III 7 fun and educational games. History I 4 quizzes on history and famous people, and a simulation of American elections. Mathematics II 14 programs that include drills in arithmetic, algebra lessons, and math games. Mathematics II 15 programs on metric conversion, factoring, probability, math, and algebra. Mathematics VI 15 programs on metric conversion, factoring, probability, math, and algebra. Mathematics VI 15 drills, quizzes, and math games. Mathematics VI 16 more drills, quizzes, and math games. Mathematics VI 16 more drills, quizzes, and math games. Mathematics VI 17 more drills, quizzes, and math games. Mathematics VIII 11 drills, games, and lessons on algebra, trigonometry, slopes, and factoring. Geography I 13 quizzes and a printer map of England. Science II 12 programs, mainly chemistry. Science III 2 assorted science programs. Science III 2 assorted science programs. Science III 2 assorted science programs.	DISK NAME	DISK ID	DESCRIPTION	
Sorting lists. English I 1 14 programs such as word games, parts of speech, poetry, and definitions. English II 16 programs that include spelling and vocabulaty drills, homonyms, verb forms, and punctuation. English III 15 programs on parts of speech. English IV 15 programs that include drills on rhyming, unscrambling words, and spelling. English VI 15 programs that are mostly spelling drills and unscrambling words. There is also a quiz on Shakespeare plays. English VI 12 programs, including tests on word meanings, spelling, and vocabulary. English VII 3 challenging word games. Games II 14 fun and educational games. Games III 7 fun and educational games. History I 4 quizzes on history and famous people, and a simulation of American elections. Mathematics II 15 programs that include drills in arithmetic, algebra lessons, and math games. Mathematics III 15 programs on metric conversion, factoring, probability, math, and algebra. Mathematics IV 14 programs that include factoring, drills, and algebra lessons. Mathematics V 15 drills, quizzes, and math games. Mathematics VI 15 more drills, quizzes, and math games. Mathematics VI 15 more drills, quizzes, and math games. Mathematics VI 16 more drills, quizzes, and math games. Mathematics VII 16 programs on resultants, prime numbers, roots, and math quizzes. Mathematics VIII 11 drills, games, and lessons on algebra, trigonometry, slopes, and factoring. Geography I 13 quizzes and a printer map of England. Science II 13 programs, mainly physics and chemistry. Science III 12 assorted science programs.	Business	1		
and definitions. English II 16 programs that include spelling and vocabulaty drills, homonyms, verb forms, and punctuation. English III 15 programs on parts of speech. English IV 15 programs that include drills on rhyming, unscrambling words, and spelling. English V 13 programs that are mostly spelling drills and unscrambling words. There is also a quiz on Shakespeare plays. English VII 12 programs, including tests on word meanings, spelling, and vocabulary. English VII 3 challenging word games. Games II 13 word guessing, logic, and math games, and a simulation of Hi-Q. Games III 7 fun and educational games. History I 4 quizzes on history and famous people, and a simulation of American elections. Mathematics II 15 programs that include drills in arithmetic, algebra lessons, and math games. Mathematics III 15 programs on metric conversion, factoring, probability, math, and algebra. Mathematics IV 14 programs that include factoring, drills, and algebra lessons. Mathematics VI 15 drills, quizzes, and math games. Mathematics VI 16 more drills, quizzes, and math games. Mathematics VI 16 more drills, quizzes, and math games. Mathematics VII 16 more drills, quizzes, and math games. Mathematics VIII 11 drills, games, and lessons on algebra, trigonometry, slopes, and factoring.
