## The Learning Company®

Dear Learning Company Customer:

Congratulations on purchasing the IBM/Tandy & compatibles version of this program. We hope our software will provide you and your children with many hours of enjoyment.

### Using These Disks:

In this package are two complete sets of disks for this program: one set is in 3.5" format, and one is in 5.25" format. We have provided these so you will have the right size disk regardless of which computer system you own.

### Hard Disk Owners:

These disks allow you to easily install this program on your hard drive or make a back-up copy. The appendix section of the User's Guide will show you how easy this is to do.

### Copyright Protection:

We do want to point out that the program you have purchased is for your use only. Remember, it is against U.S. copyright law to make copies of these disks for use by others. We would appreciate your help with this by making only one back-up copy for your own personal use. Your assistance will allow us to continue to provide these types of services in the future.

School versions for most of the Learning Company's programs are available for teachers and schools. For more information or technical assistance, please call us toll free at 1-800-852-2255.

Thank You
